PROJECTS

Payment Website
December 2023 - February 2024
· 1. Implemented user authentication with secure sign-in functionality.
· 2. Enabled users to view their wallet balance, transfer money to others, view transaction history, and add money to their wallet via net banking.
· 3. Developed a dummy bank webhook API to function as a payment gateway, eliminating the need for third-party provider.

Mental Health Tracking App
May 2024 - May 2024
· 1. Enabled user interaction with a chat box for discussing their mental condition.
· 2. Implemented a feature allowing users to check a list of doctors for their issues and book appointments.
· 3. Contributed to both the frontend (interface, UI) and backend during a hackathon.

Package Delivery System
July 2024 - Present
· 1. Working on a package delivery system aimed at simplifying the delivery process.
· 2. Partners update the database as they travel from point A to point B on specific dates.
· 3. When users check for available partners to deliver packages, they receive a list of drivers meeting the specified criteria and the price based on the distance the package travels.
